Part n° :P50

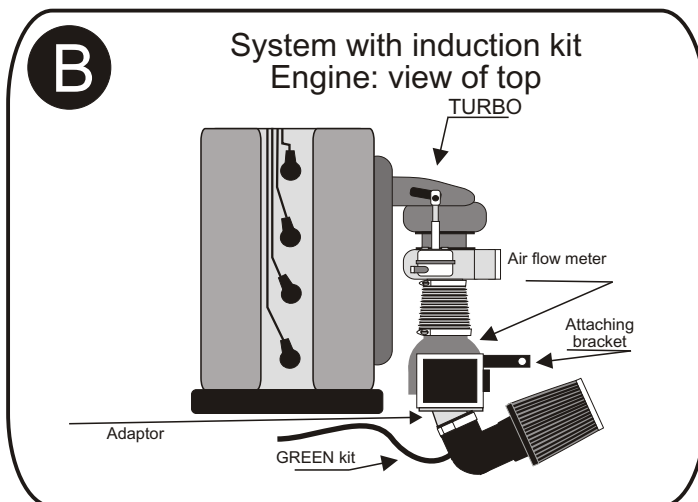

FITTING INSTRUCTION

- Remove the air box.
- Disconnect the air flow meter from the air box.
- Connect the adaptor to the air flow meter with the 6 mm screws provided.
- Put the hard hose on the turbocompressor and tighten the clamp.
- Put the air flow meter in the hard hose.
- Put the attaching bracket on the air flow meter and tighten the screws:
a: on the air flow meter.
b: on the fixing screw of the old air box.

CAUTION:

The air flow meter mustn't be near the alternator.
In the other case twist attaching bracket in order to hold up the air flow meter.

- Put the induction on the air flow meter.
- Put the breather hard hose supplied in the original hard hose.

IMPORTANT:

The running of your engine is linked directly with the maintenance of the air filter. Clean your air filter every 7000 kms or 4500 miles with Green cleaning products..

WARRANTY:

The air filter guarantee is for defects in materials and workmanship only. Guarantee is void if the air filter is damaged by an accident, unreasonable use, neglect, misuse, abuse, improper installation or other causes not arising out of defects in materials and workmanship. The induction kit is a technical product so it is necessary to have some basic mechanical skills. If problems do not hesitate to have your induction kit fitted by a professional.
