FITTING INSTRUCTION

- Remove the air box N1 (see diagram A).
- Leave the fresh air tube inlet N2 in original place (see diagram B)
- Fit the direct induction kit to the throttle box and position as in diagram B.
- Connect the original breather pipe to the induction kit with the help of the flexible pipe provided (see diagram B).
- Connect the small negative pressure pipe to the hole of the kit flexible pipe (see diagram B).

IMPORTANT:

The running of your engine is linked directly with the maintenance of the air filter. Clean your air filter every 7000 kms or 4500 miles with Green cleaning products..

WARRANTY:

The air filter guarantee is for defects in materials and workmanship only. Guarantee is void if the air filter is damaged by an accident, unreasonable use, neglect, misuse, abuse, improper installation or other causes not arising out of defects in materials and workmanship. The induction kit is a technical product so it is necessary to have some basic mechanical skills. If problems do not hesitate to have your induction kit fitted by a professional.
