 00.33.3.44.02.87.10

Part n° :P227

FITTING INSTRUCTION

Remove the original air box. (See diagram A).
Disconnect the air temperature probe of the air box and fix it to green filter.
(See diagram B)
Disconnect the oil vapor recycling pipe then fix the small green filter with
the connector provided.(see diagram B)
Remove the attaching bracket of the air box.(see diagram C).
Screw the threaded bars (see diagram D).
CAUTION : the threaded bars must be deeply screw to the carburator
(see diagram D).

Fix the green filter with the clamp to the carburator
Fix the two washers and the two lock nuts on the threaded bars.

**CAUTION THE FOLLOWING IS VERY IMPORTANT
IT IS ABOUT THE TIGHTNESS AND THE LIFESPAN OF YOUR AIR FILTER**

- **Tight method of the lock nuts:**

a)Screw the nut until contact of the washer (when you will not be able to turn the nut with your finger)

b) Tighten a quarter turn **NOT MORE** .

c) Tighten the clamp of the green sans effort .

The filter is now tight enough to have a tightness and not too much in order to not deteriorate it.

ANOTHER TIGHT WILL BE USELESS

Connect the air temperature probe.

IMPORTANT:

The running of your engine is linked directly with the maintenance of the air filter. Clean your air filter every 7000 kms or 4500 miles with Green cleaning products.

WARRANTY:

The air filter guarantee is for defects in materials and workmanship only. Guarantee is void if the air filter is damaged by an accident, unreasonable use, neglect, misuse, abuse, improper installation or other causes not arising out of defects in materials and workmanship. The induction kit is a technical product so it is necessary to have some basic mechanical skills. If problems do not hesitate to have your induction kit fitted by a professional.
